A service by **B.O.T**

B.O.T Launches a New Service

Taking youth of Lebanon and Jordan into the world of Artificial Intelligence.

A new service provider of Dataset Collection and Data Annotation for Computer Vision and NLP models.

With an expandable team of over 2,000 Annotators, HAIVO by B.O.T offers fast, high-quality & accurate annotation which is fundamental for training AI models.

We work closely with AI engineers to learn about their data annotation needs and build a team of annotators that fits the project perfectly.

HAIVO by B.O.T unites human and machine intelligence to create effective machine learning algorithms and build datasets.

HAIVO ACHIEVEMENTS SINCE LAUNCHING

250

youths got trained
